

We all have A right to some peace and quiet. There are many of us who work very hard, and when we are home with our families we have every right to be able to enjoy that time without interuption. Some of these telemarketers call as early as 7:00 or 8:00 in the morning without regard for your family. They are intrusive, and quite often rude. Many times they repeatedly call after being asked not to. We have no interest in receiving these calls so why should we have to. That is our decision not anyone elses!!!!
